

North Texas FSDO FAA Safety Team (FAASTeam), SW19 presents:

**CO - Its a GAS!!!**

Is carbon monoxide (CO) a threat to you when flying? Are you sure? When was the last time you thoroughly (and properly) checked? The combustion engine in the airplane you fly creates colorless and odorless carbon monoxide. CO can inadvertently enter the cabin area and pose a serious threat while flying. Learn more about this potentially deadly and silent killer and how you can improve your chances of not having carbon monoxide poisoning happen to you. **PRIOR TO ATTENDING A SAFETY SEMINAR PLEASE REVIEW AND ABIDE BY CURRENT CDC, STATE AND LOCAL HEALTH GUIDELINES.**

**Directions:** From Interstate 35 W, take the exit for Alliance Blvd onto the frontage road.  
At Alliance Blvd, go west to Heritage Blvd.  
Turn right onto Horizon Dr.  
Tarrant County College - Aviation building

### **A message from the National FAASTeam Manager**

Earn your WINGS to get a chance to win a prize. Go to [www.wingsindustry.net](http://www.wingsindustry.net) for more info.
